

Were You “Bitten By The Bug”? — 2007 ARRL Field Day Results and Stories

With a tip of the cap to those who specialize in “Top Ten” lists...

Dan Henderson, N1ND

dhenderson@arrl.org
ARRL Regulatory Information Manager & Field Day Manager

“Percy” — the 2007 Field Day Hamburg was reported at hundreds of Field Day sites across the US, Canada and beyond. After returning to his “home office” in Newington, he was asked to relate some of the stories he uncovered in his travels. So, he has put together a “Top Ten” list. This isn’t a list of the Top Scoring Stations, because the highest score really isn’t the purpose of Field Day. It isn’t a list of the Top Ten best operators he found, the ten most important things about FD or even the ten best FD food locations (though Percy is known to be partial to FD cuisine). It is simply a Top Ten List of “Field Day Things” from 2007...

10) “Amateurs love to talk on the radio.”

Now mind you this is a given, because after all we *are* communicators, aren’t we? And with a total of over 1.2 million QSOs reported during FD2007, that’s over 50,000 contacts every hour over a 24 hour period. That’s an excellent total — especially when you consider Ol’ Sol is being as uncooperative as possible with sunspot. I guess what this really means is that there are always bands that you can utilize, regardless of time of day or propagation.

9) “Amateurs are like us bugs — you find them everywhere.”

Everywhere Percy went, we ran into amateurs participating in Field Day. In fact there were a record 2,331 Field Day entries submitted — 4% more than the previous record of 2,241 in 2004. And that record number of entries contained yet another record as an all-time high of 34,833 operators, helpers and visitors were reported at FD sites. Modest numbers when compared against the number of licensees in the US, but remember, not every group or individual that participates in Field Day (particularly home stations) submits entries to document their participation.

8) “You gotta GOTA”

Percy was well aware of the two signifi-

Amy, KE7NVZ, works ‘em like a pro on 20 meters SSB at the K7VIT Field Day site in Hillsboro, Oregon.

GOTA station KC0WQY in operation at the KC0AHN site in Wichita, Kansas. Logan, KC0VUH; Matt, KC0VUG; Samantha, KC0MTM; Rachel, and Jacob operating with up to four headphones!

cant changes in the Part 97 rules made since FD2006, and he was pleased to observe that besides participation in general being up, there was also an all-time record number of “Get On The Air” — GOTA — stations available for newcomers to try their hand on the air. Percy thought it a bit ironic that the first year all US amateurs have at least some HF privileges coincided with a year predicted as the very bottom of the sunspot cycle, which meant generally poor propagation on the most popular newcomer HF band — 10 meters. But he did find a silver lining in the fact that perhaps the newcomers would upgrade and gain greater privileges after whetting their appetites at one of the 467 GOTA stations reported in 2007 (an increase of over 8% from last year).

7) “What’s that strange ‘buzzing’ in my antenna?”

Well, Percy was able to pretty quickly figure out that buzzing was probably yet another increase (though small) in number of Digital mode contacts being made. While the number of both CW and Phone QSOs were down slightly (thanks in large part to poor band conditions), many groups are discovering the relatively easy digital modes, such as RTTY and PSK31, that can be made using computer interfaces and readily available software. While still constituting only a small portion of FD contacts, the number of reported digital contacts has more than doubled since 2000 (up 113%).

6) “Yummy! Yummy! Yummy!”

Unlike the pesky mosquitoes, Percy found epicurean delights at almost every FD site. From simple hamburger and wiener roasts to steak dinners to home-made chili to desserts that would make Emeril himself proud, FD is always certain to be one of the highlights of most amateurs’ “social calendars.” After all, the troops have got to be fed, and clubs seem

K1YPP near Damascus, Virginia, on Sunday morning of the contest. Operating from the Appalachian Trail, he used a homebrew 1.25 W/dc receiver and ¼ wave wire antenna.

to take seriously the motto “Only the best for our gang!” Make sure to read the ARRL Field Day Online Soapbox www.arrl.org/contests/soapbox/ to discover how hundreds of clubs and groups approach this annual event. And why not add your own FD experiences to the site to share with others?

5) “Mommy — Can I go outside and play all night?”

Part of the FD experience is setting up stations quickly in places where you usually do not operate. As usual, the vast majority of entrants choose to test this side of their planning skills, as 1758 (75%) of all entries operated away from home. Fields, parks, campsites, EOCs, boats, campers, tents, hiking trails — you name it and odds are you would find a FD group setting up in those kinds of situations. This isn’t meant to downplay the role of those who participate from home stations. On the contrary, it underscores the role ALL stations and operators have to play in emergency operations. (For example, just ask those who were assisted during Katrina by home stations serving as relays and keeping the flow of information going, how important the Class D and E stations are.)

4) “You’re sitting there with WHO???”

More and more, Percy found that elected officials and served agencies are gaining a better awareness and understanding of the role that Amateur Radio can play in emergency communications and preparedness. For example, the Sussex Amateur Radio Association and the Nanticoke Amateur Radio Club joint operation played host to Delaware Governor Ruth Ann Minner, who proclaimed June as Amateur Radio Awareness Month; State Secretary of Homeland Security, Dave Mitchell; Sussex County Administrator, Dave Baker and Georgetown Mayor, Mike Wyatt. But it doesn’t always have to be that high a profile. Percy observed hundreds of county officials

K5SXXK inspecting “The Box” of the satellite station at W5IU, Fort Worth, Texas.

Entries by Class

and liaisons from served agencies such as the Salvation Army and American Red Cross, attending FD demonstrations all across the ARRL and RAC territories.

3) “If at first you don’t succeed, try, try again!”

Even with all of the planning in advance, even if you take all of the possible precautions, at some point Murphy is going to visit your site in some way. For example, a concerted effort was made to put on several of the Antarctic research bases on the air by amateurs in residence. E-mails were exchanged announcing frequencies and information, and announcements were made. But when FD rolled around, there was simply no propagation for them to North America. It certainly was a disappointment, but surely doesn’t count as a failure, because the key component of FD isn’t making thousands of contacts; it’s doing the preparation and planning to be able to do what is possible when the time comes. So in spite of no sunspots, malfunctioning radios, thunderstorms that take out antennas and trees, Percy was impressed with the “stick to it” spirit of the thousands of participants.

Young prospective ham Harrison Sanders making his very first ham radio contact while his dad, Mark (left) and Jack, WØDG, look on at WØDK, Boulder, Colorado.

2) “We’re ready for our close-up Mr DeMille.”

Percy couldn’t accommodate the numerous requests he received from television, radio and print journalists for a personal interview. After all, he is naturally shy. But he was more than pleased to see hundreds of FD participants working with members of the press, telling the story of amateur radio. Sharing the story of amateur radio is important — and getting the media to assist in telling that story is important. Club and section PIOs submitted what has to be a record number of media hits to Percy in the days and weeks after FD2007. And he isn’t worried about using up your Andy Warhol 15 minutes of fame promoting the Amateur Radio Service.

And, finally, Number 1 on Percy’s Top Ten List for Field Day 2007...

Field Day is FUN!

Look at the photos in this article... Peruse the smiling faces posted in the ARRL Online Soapbox. It is obvious that the common ingredient to all of them is *fun*. It’s fun to spend time with good friends... It’s fun to learn new things... It’s fun to get on the air... It’s fun to be part of a group working for a common purpose and helping friends and neighbors... It’s fun to set a goal and achieve it during Field Day... It’s fun to take pride in our skills and put them on display to mentor others.

So to all who participated in FD2007, Congratulations! Whether you only completed a handful of QSOs to whet your appetite or posted the most claimed points in your category — if you maximized your fun during the weekend of June 23-24, you are a Field Day champion.

Field Day is always the fourth full weekend in June — which means it will be coming around again June 28-29, 2008. Why not start your own Top Ten list of things you want to accomplish for FD2008? See you on the air!

Scores

Class A stations are clubs or groups operating with more than two operators. Score listings are grouped according to the number of transmitters in simultaneous operation. The listings show club or group name, call sign(s) used, total number of QSOs, number indicating power output used (5 is less than 5 W, 2 is less than 150 W; 1 is more than 150 W), number of participants and total score including bonus points and ARRL section. Scores are listed from highest to lowest in each class. Class B stations are portables manned by one or two operators. When there are two operators, the other operator's call is listed in parentheses, if it is known. Class C stations are mobiles. Class D stations are home stations using commercial power. Class E stations are home stations using emergency power. Class F stations are EOC stations.
