Who We Are

The CC-ARC is made up of parents, teachers, students, summer campers, and even **twelve** NASA astronauts. There are Active Members who are FCC-licensed HAMs, Provisional Members who are working on their HAM Technician licenses, and Supporting Members who oversee the club activities or lend expertise where needed.

Where We Meet

The CC-ARC is based on the top floor of the Clay Center Observatory high on a hill on the campus of Dexter Southfield School in Brookline, MA. There is a radio room, a conference room with a kitchenette, a world-class telescopic observatory, and large roof decks with 360-degree views of greater Boston.

How To Join

There is no fee to join. It is recommended that children be at least age 12 and that a parent enroll as a supporting member for youth members.

Other Activities

The Clay Center Observatory hosts educational and outreach programs, public astronomy nights, a summer science camp, and it participates in astronomical research. Visit www.claycenter.org for more information.
